

# ISYA MAGHFIRA ZALFA

Bekasi, Indonesia | 005cica@gmail.com | 087805801599

Enthusiastic and motivated junior front-end developer with hands-on experience in various programming languages and frameworks. Passionate about entering the professional tech industry, with a strong concentration in Cyber Security. Committed to building secure and efficient software by combining cybersecurity principles with programming expertise. Experienced in collaborative team environments and driven to contribute to impactful, security-aware development projects.

## EDUCATION

**Informatics, Cyber Security Concentrated**  
President University, Cikarang  
GPA 3.91/4.00

**Sep 2023 - Present**

## PROFESSIONAL EXPERIENCE

**Head of External Relation, PUMA IT**  
Led partnership strategies, managed stakeholder communications, and oversaw events with external parties. Guided a team to ensure smooth execution and alignment with organizational goals.

**Sep 2024 - Present**

**Staff CX&IR AIESEC Future Leader, AIESEC in PU**  
Improved customer experience by engaging with delegates, addressing their needs, and resolving complaints. Gathered feedback, enhanced communication, and optimized service delivery.

**Feb 2024 - Feb 2025**

## PROJECT

**LUNAR AI — Mobile Chatbot Application**  
Developed a mobile application integrating the OpenAI API to deliver real-time, personalized chatbot interactions enhanced by multiple sensor inputs. Contributed to the project by designing intuitive UI/UX layouts and implementing an SQLite database for efficient local data management, ensuring a smooth and responsive user experience

**Risk Assessment — Web Application**  
Designed to assess risks and manage threat intelligence effectively. Contributed to both frontend and backend development, ensuring seamless user experience and optimized data processing. The application leverages MongoDB for robust data storage and integrates with the MISP API to deliver real-time threat intelligence insights.

**Ticketopia — Event Ticketing Website**  
Developed a dynamic ticketing website using PHP and MySQL. Built the homepage and event detail pages, enabling real-time display of event data including dates, locations, and ticket information. This project enhanced my backend development skills and deepened my experience with database integration and dynamic content rendering.

## SKILL

HTML	Java Script	UI/UX
CSS	Leadership	Teamwork
Problem solving	Java	Critical & analytical thinking
